Portfolio: <https://chirag-gajjar-software-engineer.vercel.app>

SUMMARY

Software Engineer with 7+ years of experience delivering web applications across **Frontend, Frameworks, Backend & Protocols, Databases & Caching, Cloud & DevOps**, and **E-commerce**. Harnesses AI Tools (**IDEs, CLI**, and **APIs**) to accelerate development workflows, optimize code quality, and deliver high-performance software.

TECHNICAL SKILLS

Frontend: HTML, CSS, SCSS, Bootstrap, Tailwind CSS, JavaScript, TypeScript

Frameworks: Angular, React, Vue

Full-Stack Framework: Next.js

Backend & Protocols: Node, Express, Docker, Go, Rust (Axum, Tokio), WebSockets, REST APIs

Databases & Caching: MongoDB, PostgreSQL, Supabase, Neon Postgres, Redis

Cloud & DevOps: AWS (EC2, RDS, Lambda, SES, API Gateway, CloudFormation, SAM, Amplify), GitHub Actions (CI/CD), Vercel, Netlify, Render

E-commerce: Shopify, BigCommerce

PROFESSIONAL EXPERIENCE

UI Developer, Icenter

21 April 2021 – 29 August 2025

- **Front-End Development:** Built responsive, accessible UI components for Salesmate CRM using Angular, JavaScript, and SCSS.
- **AI Tooling Integration:** Accelerated coding, debugging, and documentation using Cursor, Augment, and ChatGPT.
- **Cross-Functional Collaboration:** Partnered with backend engineers and product managers to integrate UI with CRM workflows and dashboards.
- **Optimization & UX:** Refactored code to boost performance and conducted regular UI/UX reviews to enhance usability.

Front End Developer, Lucent innovation

6 July 2020 – 20 April 2021

- **Custom Theme Development:** Built and customized responsive, mobile-friendly Shopify themes using Liquid, HTML5, SCSS, and JavaScript to boost conversions.
- **Performance & SEO:** Optimized page load speeds, compressed assets, and applied SEO best practices to maximize site performance.
- **App Integration & Features:** Integrated third-party apps and built custom functionality to extend core Shopify capabilities.
- **Cross-Team Collaboration:** Partnered with designers, marketing, and backend engineers to deliver tailored e-commerce solutions.

- UI/UX Design & Prototyping: Designed client-aligned, visually engaging layouts and wireframes using Figma, Adobe XD, and Photoshop.
- Front-End Development: Built responsive, cross-browser compatible websites using HTML5, CSS3, JavaScript, and modern frameworks.
- Usability & Engagement: Optimized navigation and mobile performance, driving a 20% increase in user engagement.
- Cross-Team Collaboration: Partnered with developers, marketers, and content creators to maintain brand consistency across digital platforms.

PROJECTS

Salesmate (CRM product) – www.salesmate.io

- Contributed to the development of **Salesmate CRM**, a SaaS-based product used by global businesses for sales automation and customer management.
- Built and optimized **Angular-based UI components**, improving responsiveness and user experience across web modules.
- Worked on **CRM workflows, dashboards, and reporting features**, ensuring seamless integration with backend APIs.
- Improved performance of critical pages by implementing lazy loading, **change detection strategies, and reusable components**.

CM Notes (Full-Stack Notes Application) — <https://main.d3jqv6bft0m3qf.amplifyapp.com>

- **Frontend Repo:** <https://github.com/ChiragGajjar123/Angular-Frontend-for-rust-backend-Notes-App>
- **Backend Repo:** <https://github.com/ChiragGajjar123/Rust-Backend-Notes-App>
- Developed a modern **Angular 22** Single Page Application using **Standalone Components, Angular Signals** for fine-grained state management, and a custom **Glassmorphism UI design system**.
- Built an interactive **4-step Forgot Password workflow** featuring real-time input verification, 60-second cooldown timers (Resend code in XXs), and inbox/spam folder user alert guidance.
- Engineered a high-performance, asynchronous RESTful API using **Rust (Axum 0.7 & Tokio)** with sub-millisecond response times and zero-cost abstractions.
- Implemented a secure password recovery system powered by **AWS SES (Simple Email Service)** with 6-digit OTP verification, bcrypt token hashing, and **60-second time-interval rate limiting**.
- Integrated **AWS RDS PostgreSQL (via SQLx)** with automatic runtime schema migrations, parameterized query binding to prevent SQL injection, and optimized database indexing.
- Configured automated Serverless deployment using **AWS SAM (CloudFormation), AWS Lambda, API Gateway**, and **AWS Amplify**, powered by **GitHub Actions CI/CD** pipelines.

cook & boardman – cookandboardman.com

- Storefront Development & UI/UX: Designed and built the Cook & Boardman e-commerce storefront on **BigCommerce** using HTML5, CSS3, and JavaScript, implementing a modernized, user-centric interface to support digital transformation goals.
- Responsive Architecture: Created fully responsive layouts to ensure seamless navigation, visual consistency, and optimal interaction across desktop and mobile devices.
- Navigation & Customer Experience: Streamlined site structure and user flows to enhance overall customer experience, improve usability, and drive engagement.

CM Expense Tracker (Full-Stack Expense Management Application)

<https://expense-tracker-app-react-node-expr.vercel.app>

- **Frontend Repo:** <https://github.com/ChiragGajjar123/Expense-Tracker-App---React---Node---Express---mongoDB>
- **Backend Repo:** <https://github.com/ChiragGajjar123/Expense-Tracker-Node-Express-Backend>
- Developed a modern **React 19** Single Page Application using **TypeScript**, **Vite 8**, **Zustand** for global state management, **Recharts** for interactive visual analytics, and **Tailwind CSS v4**.
- Built interactive financial management workflows featuring real-time budget tracking, category-wise expenditure breakdown charts, multi-field transaction search/filtering, and persistent theme settings.
- Engineered a high-performance RESTful API using **Node.js (Express 5)** optimized with Node.js **Cluster mode** multi-core process scaling, **Pino** structured logging, and **Helmet** security headers.
- Implemented secure user authentication using **JWT (HTTP-only cookies)**, **bcrypt.js** password hashing, **Redis-backed rate limiting** for DDoS/abuse protection, and email notifications via **Resend API**.
- Integrated **MongoDB (via Mongoose ORM)** featuring optimized database connection pooling, payload compression (**gzip/brotli**), and non-blocking Redis caching architecture.
- Configured automated serverless deployment on **Vercel** with environment-aware runtime detection, graceful process shutdown handling, and **GitHub** version control integration.

CM Notes (Full-Stack Notes Application) — <https://notes-next-js-mongo-db.vercel.app>

- **Frontend Repo:** <https://github.com/ChiragGajjar123/Notes---Next.js-MongoDB>
- **Backend Repo:** <https://github.com/ChiragGajjar123/Notes-App-Go-Backend>
- Developed a modern **Next.js 16 (App Router)** & **React 19** Single Page Application using **Tailwind CSS v4**, **Radix UI**, and a custom **Glassmorphism UI design system**.
- Built a dynamic dashboard featuring a **Tiptap Rich-Text Editor**, real-time search, category filters, note pinning/archiving, custom color tagging, and theme toggling.
- Designed an interactive **4-step Forgot Password workflow** with real-time input validation, 60-second cooldown timers, and **Resend API** transactional email integration.
- Engineered a high-performance RESTful API microservice using **Go (Golang 1.26 & fasthttp)** tuned to process **512K concurrent connections** with sub-millisecond response times.
- Implemented a custom **64-shard in-memory rate limiter** utilizing **FNV-1a hashing** and atomic counters to eliminate lock contention on high-frequency API endpoints.
- Configured automated background **goroutines** for expired entry cleanup and periodic 30-second synchronization with **MongoDB** for cross-restart state persistence.
- Secured authentication APIs with **bcrypt** password hashing (golang.org/x/crypto), **SHA-256** reset token hashing, and internal API key header validation middleware.
- Integrated **MongoDB Atlas (via MongoDB Go Driver v2)** using BSON document schema modeling, parameterized queries, and optimized user/note collection indexing.
- Configured cloud deployment on **Vercel** with environment variable isolation, health check endpoints (`/api/health`), and **GitHub Actions CI/CD** pipelines.

- Custom Theme Development: Built and customized responsive **Shopify** themes for Subliblanks.com using **Liquid**, JavaScript, HTML5, and SCSS.
- Catalog & Navigation UI: Designed dynamic product catalogs, promotional banners, and intuitive navigation to enhance customer experience.
- Performance & Responsiveness: Ensured cross-device compatibility and optimized site speed for faster page load times.
- Brand Alignment: Partnered with stakeholders to integrate UI/UX design with business, branding, and marketing strategies.

EDUCATION

B.tech IT – U.V.Patel, Ganpat University – 6.47 CGPA	2018
HSC – Vibrant school of science , Deesa – 53.69%	2014
SSC – Vinay vidhya mandir, khoda – 73.54%	2009
